

Starting a project with BYstudio

For discussion and sharing with colleagues. Revised 17 October 2026. Content owner: Yan Bunin.

Start with a clear first stage.

The initial task discussion is free. Describe the task in your own words. We will clarify the outcome and constraints, then suggest a scope.

For a small website, the entry format is Express. Custom development and automation are priced for the task.

Task and boundaries	One complete scenario: who uses it, what they receive and which constraints matter.
Choose an approach	Assess configuration, an existing platform and integration. Discuss custom development when the task needs it.
Scope and acceptance	We work under a contract. Agree the stage result, exclusions, acceptance, price, payment and timing for the project.
Payment	Bank transfer, Russia's Faster Payments System (SBP) or T-Bank instalments. Agree the method and terms for the project.
Handover and development	Agree project materials, code and access within scope. Third-party licences are discussed separately.
Post-launch support	Usually 7-14 days of support if issues arise. The period and scope depend on the project and are set in the contract. Further development is agreed separately.

Examples

- Krest-NN: B2C sales in Bitrix24 (<https://bystudio.ru/en/cases/krest-nn/>).
- DOROGA: website and operational CRM (<https://bystudio.ru/en/cases/doroga/>).
- Skill Build: corporate website (<https://bystudio.ru/en/cases/skill-build/>).

Discuss your task

A BYstudio specialist or Yan Bunin will respond to your enquiry. Telegram: @yanbunin · info@bystudio.ru
